No aircraft were stationed on the Stendal-Borstel (N 53/Y 75) airfield on 3 February 1951. Soviet Air Force sentries were posted at the entrance to the field. an air force detail of 30 to 40 men was still stationed at the field. No construction or preparations for re-occupation were seen. *

- * Comment. The occupation of the Stendal-Borstel airfield has not changed
- It is not believed that an air unit is stationed at the field. The small air force unit probably maintains the air force installations.
